## PROFESSIONAL SUMMARY

Dynamic entrepreneur who utilizes creativity, leadership and teamwork to design and execute solutions that create customer value. Effective communicator with ability to create marketing materials that convey value for both clients and end users.

### Key Activities:

- Engages with project teams to understand business and design goals. Incorporates industry best practices and usability research to deliver strong interactive designs.
- Consults with enterprise architects, projects, and business partners to design the architecture related to user experience (UX) of products, processes and systems.
- Participates in the process with development teams to clarify design concepts and advocate for the user experience.
- Drives the design process from concept through delivery. Translates designs into working front-end interfaces and graphics for web, print, and interactive design.
- Presents design recommendations to project teams through presentations, prototypes or other test interfaces.
- Raises product, design, usability and accessibility issues across an entire customer portfolio and effectively contributes to mitigating activities.
- As part of the enterprise architecture team proposes and implements design standards, methodologies and processes for delivery of UX services to other internal IT areas.
